About

As a front-end engineer, I strive to be challenged, build, and learn from those around me. I've contributed to products from conception to completion, been the sole front-end developer at a startup, and worked on large teams full of talented experts. Currently at TED, I've been privileged to build products I believe in that are used by millions, all while learning daily from a coworkers diverse in thought and perspective.

Skills

React, JavaScript, TypeScript, CSS3, HTML5, Gatsby, GraphQL, NextJS, Responsive web development, multivariate and A/B testing, working in interactive media for large audiences, UI design competency.

Work

TED Conferences

2016 - Now

Senior Front-end Engineer

Developed the front-end of the most visited pages on ted.com including the home, search, and video pages in close collaboration with design, product, and analytics.

Built out the two latest major iterations of video pages, the latest of which using NextJS, GraphQL, and TypeScript.

Conceived and developed prototype features resulting in 8% increase in inbound traffic from social sharing of talks.

Oversaw multivariate and A/B testing initiatives to increase engagement, improve playback metrics and user experience.

Redgage

2010 - 2016

Front-end developer and designer

Developed and designed interfaces for web, iOS, and Android in a distributed team. Managed all phases of website and app creation from conception to release.

Freelance

2008-2010

Designer and Developer

Education

Broward College

June 2009

Associates of Arts in Art & Design

Projects

Mallorie Potaznick, LMHC [↗](#)

Statically generated site for my wife's therapy practice designed and developed by yours truly. Built with Gatsby, theme-ui, and Netlify CMS.

react-native-swipeout [↗](#)

Open-source React Native component used by Shopify, Ant Design, Jitsi Meet, and contributed to by the core React Native development team.
